TRIM OPTIONS

Copper offers multiple trim pieces to span a gap between the range and the rear wall for situations where an electrical outlet or gas pipe keeps the range from fully sliding up to the rear wall.

Measure the depth of the furthest obstruction from the wall and choose the appropriate trim.

- 1" DEEP TRIM - CU-A1B-30XS-SS
- 1.5" DEEP TRIM - CU-A1B-30S-SS
- 2.25" DEEP TRIM - CU-A1B-30XL-SS

PACKAGING DETAILS

Charlie comes in a corrugated box strapped to wooden pallet.

- WIDTH: 33 1/8 INCHES
- DEPTH: 30 1/8 INCHES
- HEIGHT: 44 3/4 INCHES
- GROSS WEIGHT: 370LBS

TRANSPORT DETAILS

Copper suggests a forklift or narrow pallet jack for moving within a warehouse or loading and unloading from vehicles. Never stack more than 2 total Copper ranges. When removing a range from pallet and transporting by hand, Copper suggests at least a two person lift using appliance carrying straps to avoid injury. The use of a "carpet slider" style device has shown to reduce chances of damaging floors and range feet when sliding into position on hardwood or other scratchable flooring surface.

OPTIONAL REAR TRIM INSTALLED
